**WATER RIGHTS
SALT LAKE**

TO : JERRY D. OLDS

In your recent letter you stated that we have over irrigated 46.10 acres than allowed. We have inspected your Ariel photo and you are charging us for land not being irrigated. Such as Roads , unirrigated property and Connors. Each one of the spots on the map are 80 acres from fence line to fence line , I am sending a detailed map of watered acres and non watered acres.

There is 250 acres fenced , 56 acres of roads , corners , old ditches, and stacks yards . Dale has 20 acres he is not watering and he was supposed to transfer this to us , and he said he forgot to do this . If you take the 56 acres away and dale's 20 acres , this leaves 174 acres . We have 76 acres of our water and 100 acres of rented water so we do not feel we have over watered out property . We would like some one to come down and measure out the vacant land .

Thank you

Jim and Eileen crow
